

Disposable Passive Array - Dynamic Reference Frame

Patient Referencing and Tool Registration For Image Guided Surgery

IZI Medical Products' Disposable Passive Array - Dynamic Reference Frame (DRF) is intended to be used for patient referencing and tool registration in image guided surgeries with Medtronic® StealthStation® Systems. Each DRF comes with pre-mounted spheres decreasing mounting errors ensuring accurate results and precise positioning every time. Wear and tear becomes a thing of the past. IZI's disposable DRFs come sterile and ready to use right out of the package.

(compatible with Medtronic® StealthStation® systems)

Product Benefits

- Ready-to-use sterile frame and spheres
- Disposable, one-time use
- Unmatched accuracy of a new instrument every time
- Pre-mounted spheres save on pre-operation setup and post-operation breakdown time
- Reduced turnaround time between cases
- No sterilization costs
- Light weight

Product Specifications

- Shipped in protective, plastic clamshell
- Available in packages containing frame with 4 pre-mounted spheres

*Patent Pending
