

Disposable Passive Blunt Probe

Anatomical Palpation and Registration For Image Guided Surgery

The Disposable Passive Blunt Probe is intended to be used for anatomic palpation and registration in Image Guided Surgeries with the Medtronic StealthStation® System. The new IZI Disposable Passive Blunt Probe offers a greatly improved standard of care and accuracy when compared to the reusable probe. This is achieved through our consistent calibration and the benefit of a brand-new instrument for every patient. This sterile device is designed for disposable single use and includes pre-mounted spheres for unmatched accuracy and precise positioning every time. Wear and tear caused by repeated sterilization and typical use is eliminated.

Product Benefits

- Ready-to-use sterile probe and spheres
- Disposable, one-time use
- Unmatched accuracy of a new instrument every time
- Pre-mounted spheres save on pre-operation setup and post-operation breakdown time
- Extended ergonomic handle
- No sterilization costs
- Light weight

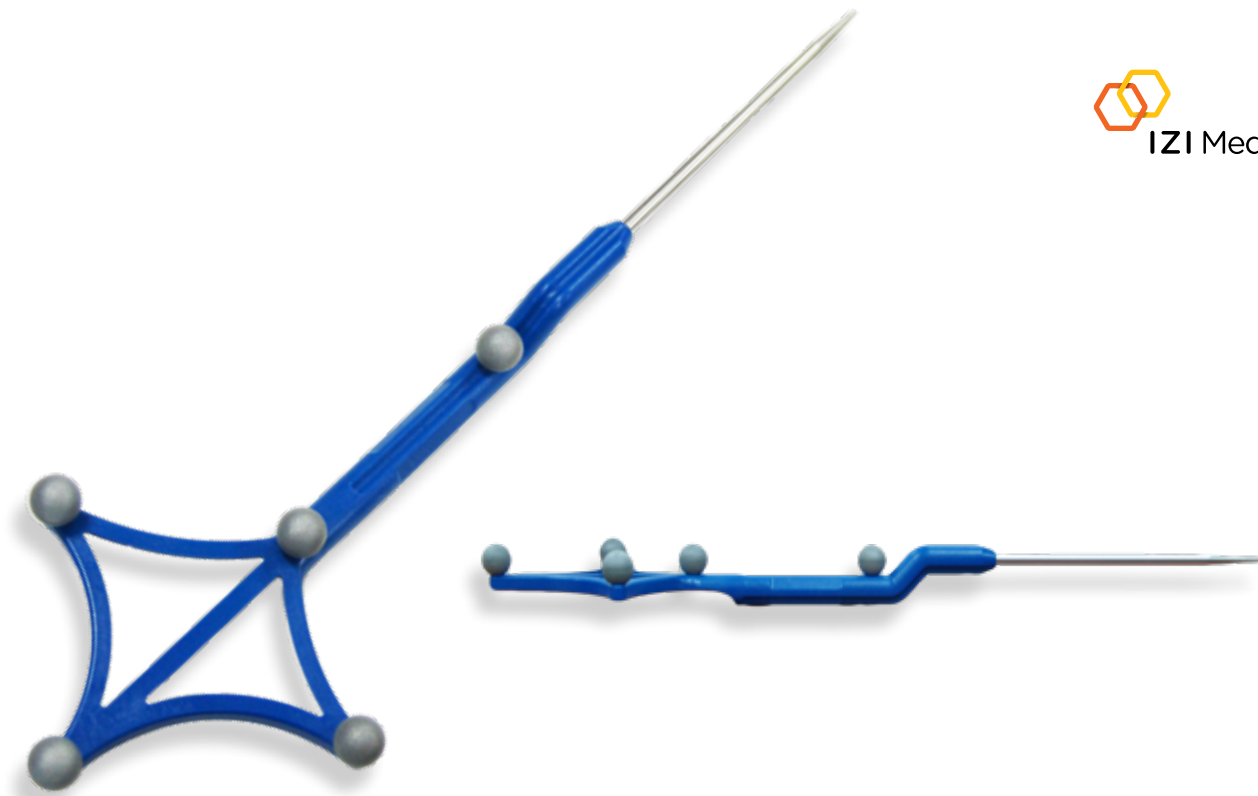

Product Specifications

- Shipped in protective, plastic clamshell
